

Professional profile of Nico Netti

Information Technology Manager and Bursar of SCM Academy.

Over more than twenty-five years at a leading Italian telecommunications company he has built up extensive experience in various fields of Information Technology.

He has been in charge of the design, development and operation of institutional websites and intranet portals of the Company, gaining in-depth knowledge of different components of the web world (technologies, organization models, trends).

He has been involved also in the development of anti-fraud software applications (as development team leader), in analysis of innovative services and support to partnership on foreign markets (as a business consultant), in design of telecommunication systems for military applications (as a systems analyst).

As part of his activities, he is certified for methodologies ITIL (Foundation) and SCRUM (Scrum Master) and quality systems based on ISO 9001 and ISO 20000 standards.

He has a degree in Nuclear Engineering at Polytechnic of Turin.
